Karson, J.A., D.J. Fornari, D.S. Kelley, M.J. Perfit, and T.M. Shank, *Discovering the Deep: A Photographic Atlas of the Seafloor and Oceanic Crust*, Cambridge University Press, 2015.

Winner of the 2016 *Prose Award for Earth Sciences*, this book is a major compilation of new images (and interpretations) of outcrops of oceanic basement rocks obtained from submersible craft and remotely operated vehicles. The first of its kind, this book documents and illustrates the current state of knowledge of the oceanic crust and serves as an authoritative educational resource both (electronically and in print) for the next generation of marine scientists.
